

OMEL DIVERSIFICACIÓN HOLDS THE AUCTION FOR THE PURCHASE OF NATURAL GAS TO BE USED AS CUSHION GAS IN A UNDERGROUND STORAGE IN THE SPANISH GAS SYSTEM

The auction for the purchase of natural gas to be used as cushion gas in the "Yela" underground gas storage has been held by OMEL Diversificación.

The total amount of gas auctioned was 1,234 GWh. The gas will be delivered between 1st August and 30th November 2015. This period will be divided as follows:

- Period 1: from 1st August to 31st October 2015.
- Period 2: from 1st November to 30th November 2015.

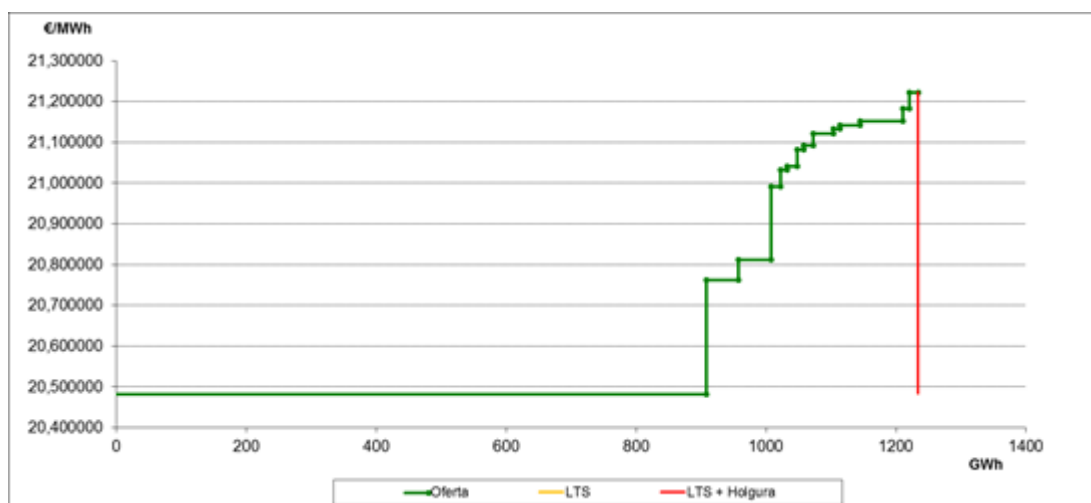

The total amount awarded was 1,234 GWh, awarded to 5 sellers.

The auction was conducted over the internet using OMIE's auction IT system. A "sealed envelope" procedure was used for matching offers.

The auction's aggregate bids curves for each of the established periods are public information and are published on the auction website (<http://www.subastagasoperacion.omie.es/en/operating-gas-auctions>), and are as follows:

Curves resulting from matching:

Aggregate bids matching curves for period 1 (1/08/2015 - 31/10/2015)

Aggregate bids matching curves for period 2 (1/11/2015 - 30/11/2015)

In this period no bids was matching

LTS (Upper Technical Limit): Maximum quantity that may be matched in one period

Holgura (Tolerance): Product quantity that may exceed the LTS of one period (this may only be used when the last matched block is indivisible)
